Research

#### **Siemens Math and Science Competition**

Regional Semifinalist

ENVIRONMENTAL SCIENCE Summer 2015

• Performed *ab initio* density functional theory (DFT) calculations with ABINIT to calculate adsorption energies of select toxic gases onto the monolayers silicene, black (alpha) phosphorene, and blue (beta) phosphore (a theoredical alleotrope).

• Evaluated the potential applications of new materials technology to resolving environmental issues such as air pollution by toxic gas remediation.

## Technical Skills\_

**GNU/Linux** System administration on Arch Linux, Ubuntu, and Fedora

Web Stack HTML5, CSS3, ES6 JavaScript, npm/yarn, Express, webpack, Preact (similar to Facebook's React)

**Git & Github** source version control

**Java** object oriented programming and concurrency

**LaTeX** document composition

## Open-source Projects\_\_\_\_\_

I develop web projects in my free time. Code is available on Github.

Mind Matter jennydaman/mindmatter

- An educational Chrome extension. Description and prototype available from the Chrome Web Store.
- Started project to help myself to both learn about web development and to practice medical vocabulary.
- Front-end JavaScript technologies include Preact and Webpack.

**Let's Talk!** twlinux/lets-talk

- Intentionally vulnerable website for beginners to learn about basic code injection vulnerabilities.
- Front-end designed with materialize-css and ¡Query.
- Express and MySQL back-end supported by containers and docker-compose.
- Shared to reddit, more than 200 upvotes on /r/HowToHack and 9 stars on Github.

TWLinux twlinux.qithub.io

- Collection of concise guides about concepts regarding Linux and cyber-security.
- Hosted on Github pages, based on the jekyll theme daattali/beautiful-jekyll.
- Contributed several pull requests to upstream repository, related to CSS bugfixes, CSS customization, and use of Docker.
